

Research Meetings spring 2025

Jan
14

PhD defence: Fetal exposure to endocrine disrupting chemicals and childhood health
Sophie Blaauwendraad, 15:30h Professor Andries Queridozaal EMC

Jan
15

Early Life Infections and NCDs: (ELIaD) project
Marianna Karachaliou, 15:00h, via Teams and in Sp-3417

Jan
29

From preconception to adolescence, the influence of parental lifestyle and fetal growth on the cardiovascular stress response and obesity risk in their offspring
Arwen Kamphuis, 15:00h, via Teams and in Sp-3417

Feb
12

The role of epigenetics in the intergenerational transmission of psychiatric risk from parent to offspring
Tim Finke, 15:00h, via Teams and in Sp-3417

Feb
26

Datasafety
Janine Felix, 15:00h, via Teams and in Sp-3417

Mar
12

Prevalence of hip dysplasia in 5-year-olds
Nadine Hendriks, 15:00h, via Teams and in Sp-3417

Mar
26

PedVision: A pipeline for medical image segmentation in scarcity of annotated samples
Morteza Homayounfar, 15:00h, via Teams and in Sp-3417

Apr
9

Does intergenerational educational mobility affect health behaviour among early adolescence
Sigrid Oosterwegel, 15:00h, via Teams and in Sp-3417

Apr
23

Parenting, parent and child lying, and child development
Emma Roza, 15:00h, via Teams and in Sp-3417

May
7

PhD defence: Merging Worlds: The role of the maternal immune system in child neurobiological development
Anna Suleri, 13:00h, Professor Andries Queridozaal EMC

May
21

Dental caries within a dynamic lifecourse framework: from childhood to young adulthood
Giselle Carbajal Rodriguez, 15:00h, via Teams and in Sp-3417

June
4

Paternal factors and pregnancy outcomes
Lotte van Brienen, 15:00h, via Teams and in Sp-3417

June
18

Insights into myopia: prevalence, impact and prevention
Dirk van Hemert, 15:00h, via Teams and in Sp-3417
